

LTI FCMS (Fuel Compliance Management System) Solution

Managing End-to-End Fuel Compliance Requirements

Managing End-to-End Fuel Compliance Requirements

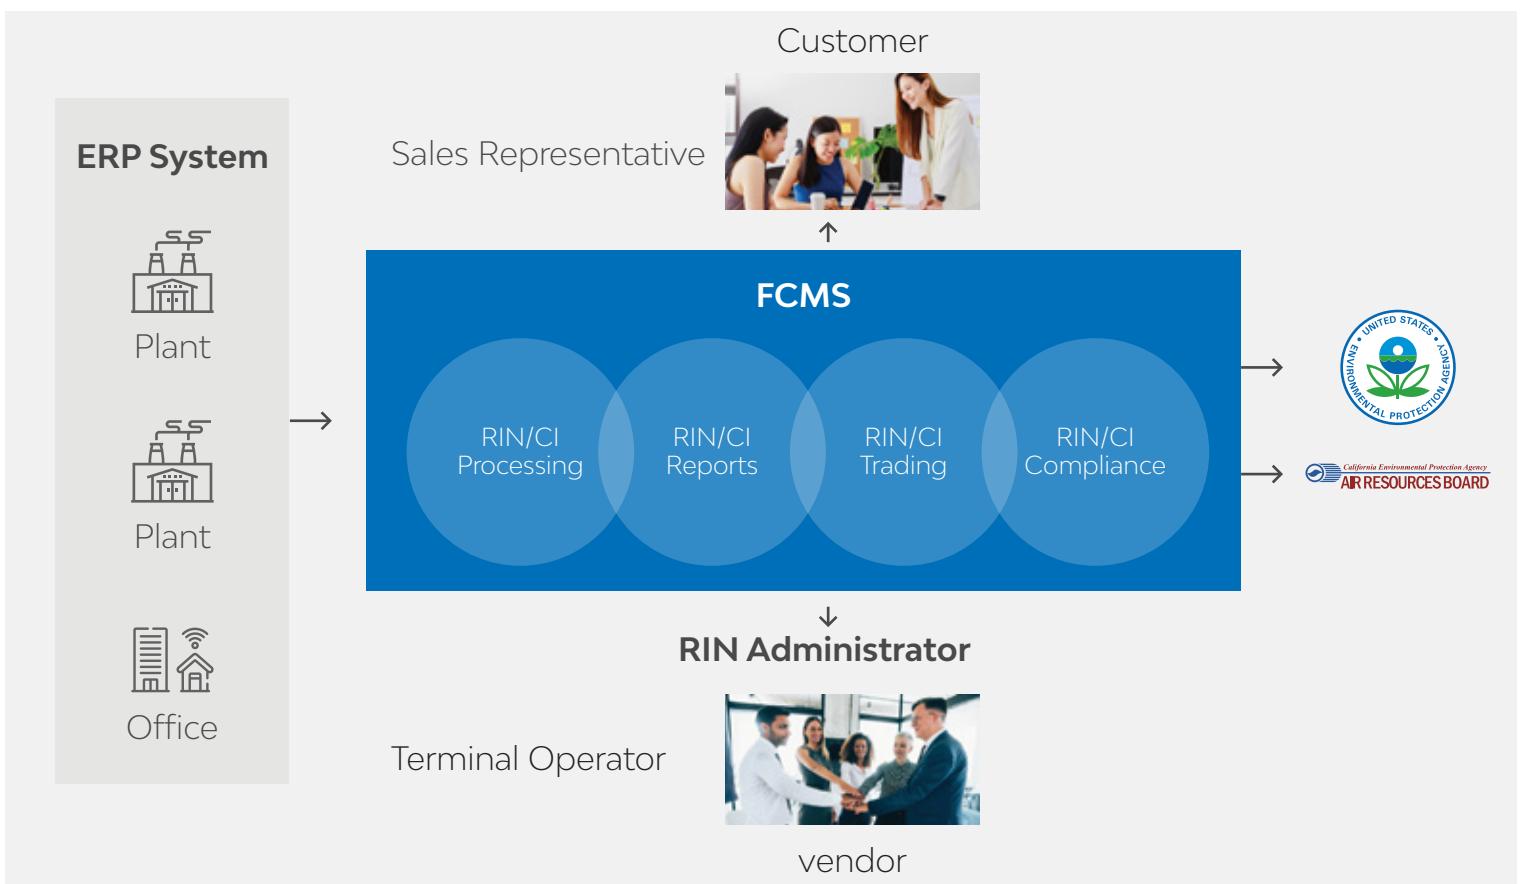

The increasing awareness about global warming and conservation of the environment has led governing bodies to introduce more and more regulations for the Energy, and Oil & Gas industry. LTI understands the challenges faced by companies in adhering to such standards and has devised the Fuel Compliance Management System (FCMS) to help them address these compliance issues.

What are we solving for?

- **Manual efforts** are being spent to address compliance needs & perform any possible compliance position simulation
- Traditionally, all organizations accord top priority to remain compliant to **avoid regulatory fines**. The cost of compliance is normally overlooked.
- **Implementing regulatory changes in time** is a tedious process of compliance, which is managed manually & in a disintegrated manner.

Solution Features

FCMS is a standalone system that enables end-to-end transaction management and is capable of interfacing with both ERP (SAP), non-ERP (RightAngle) and government (EMTS, LRT) IT systems.

- Provides of CI Capture, Sales, Returns, and CI only Trading (Credits).
- Provides of enterprise-wide dashboard for a single view of CI status.
- Manages, reviews and offers CARB compliance decisions (Retire/Purchase Credits)
- Generates comprehensive internal and CARB-compliant reports in format required by LRT
- Generates ready-to-print PTD
- Supports multiple ERP source systems through middleware & web services

Value to Customers

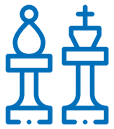

Reliability

Enhances information reliability, a “Single system of record”

Stability

Avoids business/operation disruptions & penalties, and reduces the cost of compliance

Strategy

Compliance module – A dashboard to monitor & track compliance position. It helps businesses to define a better RF procurement strategy and enhances trading opportunities

Transparency

Improves transparency & builds trust, resulting in constructive engagement with regulator

Efficiency

Improves efficiency & accountability - Quick implementation cycle & ready-to-use solution with minimal customization.

Integration

Pre-defined interfaces with regulatory IT systems for both EMTS & LRT.

LTI (NSE: LTI) is a global technology consulting and digital solutions company helping more than 420 clients succeed in a converging world. With operations in 32 countries, we go the extra mile for our clients and accelerate their digital transformation with LTI's Mosaic platform enabling their mobile, social, analytics, IoT and cloud journeys. Founded in 1997 as a subsidiary of Larsen & Toubro Limited, our unique heritage gives us unrivalled real-world expertise to solve the most complex challenges of enterprises across all industries. Each day, our team of more than 30,000 LTItes enable our clients to improve the effectiveness of their business and technology operations and deliver value to their customers, employees and shareholders.
