

Let's Solve

LTI's Controlled Drug Compliance Solution

A Larsen & Toubro
Group Company

Background

Narcotic drugs and psychotropic substances are part of “Controlled Drugs” and have several medical and scientific uses. However, these drugs can be subject to abuse and trafficking.

Hence, stringent government regulations are the need of the hour to ensure superior monitoring and control in procurement, processing, and sales.

Also, organizations with SAP systems use manual-driven processes for audit-trail and compliance documentation related to consumption of Controlled Drugs for healthcare products. This leads to lack of timely information for appropriate proactive business decisions.

Key Facts

- › Controlled drugs include opioids, stimulants, anabolic steroids, etc.
- › Up to 50% reduction in manual efforts in process execution*.
- › Proactive action for license renewals with built-in alerts, enabling business continuity without disruption.
- › Real-time drug compliance analytics.
- › Seamless integration with SAP S/4HANA.

* Based on LTI experience

Objectives of Controlled Drug Compliance Solution

- 1/ Monitoring of supplier and manufacturing plant license drug Information.
- 2/ End-to-end process monitoring of events related to controlled drugs:
 - > Monitoring end-to-end processes for the following events related to controlled drugs: Monitoring licenses of supplier and manufacturing plant at the time of purchase order, purchase requisition and sales order; and validating the license at the time of GRN.
- 3/ Ability to take proactive measures based on monitoring mechanism, such as notifying near-expiry of licenses.
- 4/ Ability to automatically validate controlled drug licensed quantity based on sales forecast information.

Benefits of LTI Solution

- > Automation of the monitoring and license validation process of the procurement and usage of controlled drugs, will make the business system more efficient.
- > The FIORI Dashboard provides material and plant real-time details related to controlled drugs and license compliance.
- > 50% or more reduction in manual efforts during the business process execution:
 - 100% inventory control of classified substances / materials
 - Real-time drug compliance analytics
