G SUITE

Collaboration & Productivity

What is it?

G Suite is a suite of secure productivity and collaboration applications. You might wonder what the difference is between the free applications offered by Google (such as Gmail) and paying for the same services? G Suite adds enterprise-level features for paying customers. Some of these features include shared calendars, (optional) unlimited cloud storage, advanced admin controls such as adding and removing users, two-step verification, and single-sign-on. In addition, G Suite offers simple data migration tools to transfer all your company's data to G Suite.

Pricing (ex GST)*

Multiple pricing models for different business structures are available.

Basic	Business	Enterprise
A\$8.40/user/month	A\$16.80/user/month	A\$34.00/user/month

*Get an additional 10% off through the Cloud Club®

*Managed Subscription Services are provided to clients of RSM by RSM Digital Australia Pty Ltd ABN 53 619 724 551. Subject to terms and conditions.

FEATURES

Apps

Get access to Gmail, Calendar, Meet, Chat, Drive, Docs, Sheets, Slides, Forms. Business & Enterprise plans come with Cloud Search & Apps Script.

Document-Sharing

You can easily share your files with fellow team members in the G Suite account using Team Drive. You can control how the files can be accessed: view-only access, comment, or edit.

Increased File Storage

File storage can be a challenge not only to big corporations but also to small businesses. You have a need to retain and search large numbers of emails & online files. G Suite Basic offers 30GB of cloud storage. Business & Enterprise plans have unlimited storage.

Your own domain name for emails

Have your email domain carry your business name (yourname@yourcompany.com). Having your own domain name builds trust with customers and there is no business too small to have customised emails – it is very affordable with G Suite. You can also create multiple email aliases and domains.

Administration controls

If an employee leaves your company, you can control and access the employee's email in G Suite and the files (Google Docs, Slides, Sheets). If individuals leave the company, the admin or the owner has full access to the file, unlike regular email accounts. While those who leave lose access to the files, the team access continues uninterrupted.

Single Sign-In

G Suite enables a single sign-in for other cloud-based business applications such as DocuSign & Salesforce.

Added Security

G Suite has a 2-step verification for users. If you log in to G Suite or other related applications using another computer, Google will text you your verification code which you would input to the verifier. This is very important in securing the cloud backup particularly if it contains sensitive files. Audit reports are also available on Business & Enterprise plans.
