## FIGURED Farm Financial Management Software

### What is it?

Figured is the world's first platform to provide farmers and their advisors with immediate access to financial data and insights for better decision making. Figured uniquely integrates financial data with a vast array of farm production data in a cloud platform, connecting farmers with their advisors and stakeholders, to manage farm businesses. With real time insights into the farm, and an ecosystem of production data, each member of the farming team can provide their expert input and ensure that farmers move into the future with confidence. Figured is made of four key components: Financial planning, production tracking + management, reporting and integration with farming and business systems.

### FEATURES

- **Financial planning**  
Build financial plans which are not confined to fixed time frames, easily create scenario plans over multiple years, and create and save unlimited reforecasts throughout the farming year
- **Farm operations**  
Track all production and farm operation activity in Figured, including production quantities and volumes of milk solids, livestock and crops, as well as tracking all inputs associated with farm operations
- **Reporting**  
Produce detailed financial, production, management and year end financial reports. Any user can add comments to reports, export as PDF or share directly from Figured, so everyone in the farming team can stay up to date with the farm's performance.
- **Data integration**  
Figured uniquely integrates financial data with a vast array of farm production data in an easy to access cloud platform
