## AUTOENTRY

### Bill & Expense Management Application

**AutoEntry**

#### What is it?

AutoEntry captures and analyses scanned and photographed paper documents, automating data entry into a user's accounting software. It covers purchases, sales, expenses for reimbursement, bank statements and supplier statements. Line items are captured across all areas, making the software perfect for a business looking for a solution that will cover a wide range of solutions.

#### FEATURES

- **Flexible document capture**  
Automates the accurate capture of data from scanned and photographed images of bank and credit card statements, bills, invoices, expenses, receipts and more
- **Full line item detail**  
Captures full line items, including the description, unit price and quantity for each line
- **Purchase order matching**  
Syncs captured invoices to matching open purchase orders
- All of your document's data is extracted and verified during processing, removing manual errors
- How you analyse and process invoices and receipts is remembered, including which supplier account, nominal and tax codes you assign
- Automatic publishing of documents as soon as they are done processing, so you can get on with work

#### How do I sign up?
