

# Wavelength Data Centre Interconnect

Fast, flexible connectivity when you need it.

In a world where the only constant is change, it pays to have a solution like Wavelength Data Centre Interconnect (DCI) supporting your business.

Delivered over Telstra Wholesale's secure fibre optic network, Wavelength DCI is here to provide your business with the low-risk, cost-efficient bandwidth it needs to thrive – now and long into the future.

## A flexible approach to capacity management

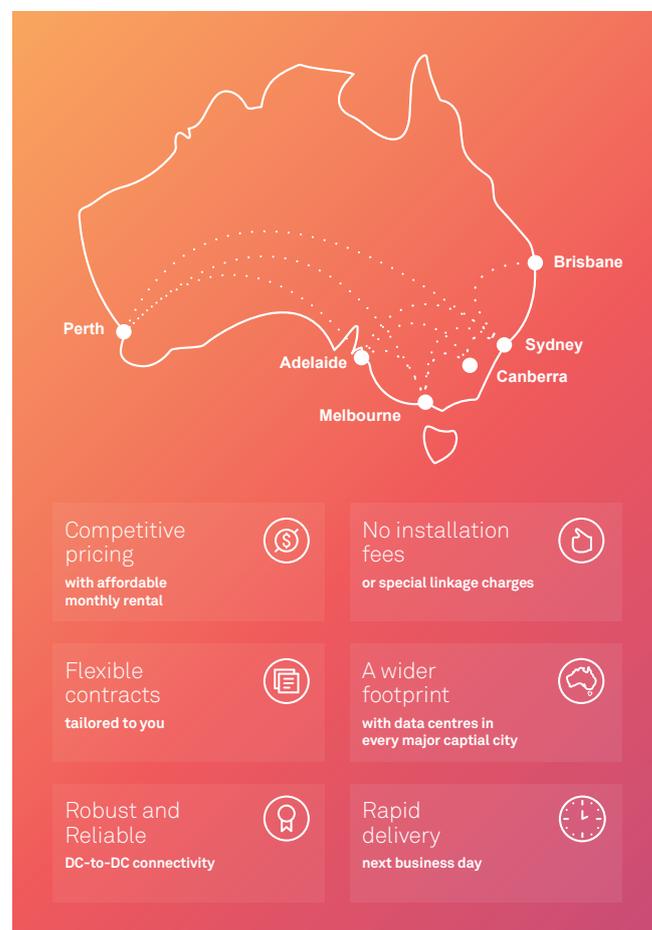

- With our next-business-day delivery service, Wavelength DCI can help you provide an always-on service for your customers.
- Installation is free and our contracts are flexible. Simply let us know the extra bandwidth you need and we'll switch it on for you.

## Uncompromised reach and reliability

- We now have data centres in every major Australian capital city to deliver unprecedented connectivity, coast to coast.
- By adding Telstra Wholesale to your portfolio, you'll be able to enjoy the full business continuity that comes from mitigating the inconvenient risk of carrier drop-out.

## The network of the future

- Our service is driven by a carrier-grade platform that offers your business an efficient and cost-effective way to deploy services across Australia.

Competitive pricing with affordable monthly rental		No installation fees or special linkage charges	
Flexible contracts tailored to you		A wider footprint with data centres in every major capital city	
Robust and Reliable DC-to-DC connectivity		Rapid delivery next business day
